

`stats::lm() fit`

`vcov_hc()`

S3 object: `hcinfer_vcov`

covariance matrix, residuals, leverage, adjustment factors, method parameters

`vcov()` `plot()`

calls

`hcinfer()`

S3 object: `hcinfer`

covariance object quantities, tests, confidence intervals, null values, critical value

`tests()` `confint()` `summary()` `plot()`

`boot_pairs()`

S3 object: `hcinfer_boot`

bootstrap replicates, standard errors, confidence intervals

`coef()` `vcov()` `confint()` `plot()`

`gls_mult()`

S3 object: `gls_mult`

mean and dispersion coefficients, model-based covariance, fitted variances, log-likelihood

`coef()` `vcov()` `tests()` `confint()`
`summary()` `plot()` `logLik()` `AIC()`
`BIC()`
